

OCTOBER 5, 2011

Air Quality/Greenhouse Gas Specialist

The Planning Center | DC&E is seeking an associate- or entry-level scientist/planner with experience in air quality modeling and greenhouse gas emissions inventory development.

Job responsibilities include air quality technical reports, air quality computer modeling, and mitigation to assess environmental impacts under the California Environmental Quality Act (CEQA) and/or National Environmental Quality Act (NEPA). Typical projects include general plans, climate action plans, land use plans, development projects (e.g., schools, stadiums, commercial centers, warehousing, residential, etc.), and roadway projects.

The ideal candidate will have educational and/or experience in computer modeling, math, engineering or physics and be a highly motivated self-starter. Ability to use high-level functions in Excel, knowledge of URBEMIS, CalEEMod, and ICLEI's CCAP is a plus.

We offer a competitive salary, generous benefits, and a casual work environment. The selected candidate will work from our corporate headquarters office in Santa Ana.

The Planning Center and Design, Community & Environment (DC&E) merged in March 2011, and provide planning and design services throughout California and the Intermountain West.

Please apply online at www.planningcenter.com (Join Our Team). Include a cover letter with the subject line "Air Quality/Greenhouse Gas Specialist (calapa)," your resume, and salary requirements and/or history as a PDF attachment.

The Planning Center | DC&E is an equal opportunity employer.
